EDUCATION

Carleton University

Bachelor of Engineering in Software Engineering

Ottawa, ON

Aug. 2022 – May 2027

EXPERIENCE

Co-Founder & Engineering Lead

May 2026 – Present

Builders' Collective Ottawa

Ottawa, ON

- Co-built an **n8n** outreach automation pipeline with a teammate, automating the community's outreach workflow end to end
- Built and maintain builderscollective.ca, a **React** + **Vite** SPA deployed on Netlify behind Cloudflare, including a custom animated ASCII backdrop component
- Wrote a **Python** media pipeline (Pillow, ffmpeg, cairosvg) that programmatically renders branded event posters and beat-synced 1080x1920 video reels from the brand system
- Scaled the community to **400+ members** and ran technical events, including an official Cursor meetup at Carleton (**45 attendees**, fully booked), recurring sold-out co-hacks, and mentoring at cuHacking 7

Ambassador

Aug. 2026 – Present

Cursor (SpaceXAI Ambassador Program)

Ottawa, ON

- Selected to represent Cursor in Ottawa; co-hosting a Grok bot workshop and build session at Carleton in Oct. 2026

PROJECTS

Second Brain | Claude, Grok, Notion, MCP

2026

- Built a shared context layer in Notion, exposed through the **Notion MCP** server, so **4–6 agents** across **3 active projects** work from the same up-to-date state
- Integrated a proactive **Grok** bot that asks questions about ongoing work, surfaces priorities, and writes updates back to Notion to keep context current without manual upkeep
- Drives content generation for Builders' Collective Ottawa, giving agents shared brand and event context to draft posts and announcements

Darwin | Next.js, TypeScript, Tailwind, Prisma, Postgres, Stripe Connect, Vercel

2026 – Present

- Built a verified marketplace for Canadian university students, gating access with student email, student ID, and face photo verification
- Designed an escrow payment flow on **Stripe Connect** that holds funds on order and releases them only after buyer and seller both confirm handoff in-app
- Launched the waitlist at darwinmarketplace.ca with a paid founding-tier whitelist, migrating checkout from Lemon Squeezy to Stripe and processing claims through a live webhook
- Leading a 5-person founding team through MVP launch at Carleton and incubator applications to Hatch and Lead to Win

613 Webring | JavaScript, Vercel

2026

- Built and launched a webring connecting the personal sites of Ottawa builders at 613webring.ca, with an embeddable widget for member sites
- Maintains a crawled index of member sites that serves as the data layer for planned community tools such as a member matchmaker

Maximus | Raspberry Pi 5, OpenClaw, Gemini, n8n, Cloudflare Tunnel, Telegram

2026

- Self-hosted a personal AI agent on a Raspberry Pi 5, controlled through a Telegram bot and exposed via Cloudflare Tunnel
- Designed a content pipeline using the Claude API with ideator, drafter, and critic stages feeding a Telegram approval queue

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS

Frameworks: Next.js, React, Vite, Tailwind CSS, shadcn/ui, Prisma, discord.py

Infrastructure: Vercel, Railway, Netlify, Cloudflare, Supabase, Postgres, Stripe, Raspberry Pi

AI & Tools: Claude API, Claude Code, MCP, Cursor, Gemini, Grok, Groq, n8n, Pillow, ffmpeg, Git
